

User Feedback

I found the onboarding screens very helpful. The 'Next' and 'Skip' buttons were clearly visible, which made it easy to navigate. I liked having both swipe and tap options — it made the app feel friendly and easy for anyone to use.

When I tapped 'Start Cooking', I was expecting to see some recipes or categories, but the home screen felt a little empty. If there were 2–3 sample recipes or popular picks shown there, it would grab my attention better.

The overall design is neat and calming. The colors are soft, and the text is easy to read. I feel like this app would be really helpful for beginners like me who just want quick, simple recipes.

User Summary:

Onboarding flow is smooth, buttons are clear, but the home screen could use more content to feel complete.
